Installation Instructions
CP-BLNK-BLK-N4 or CP-BLNK-SS-N4X
Cover Plate with Pilot Hole

IMPORTANT!

FOLLOW THESE INSTRUCTIONS CAREFULLY IN ORDER TO GET A WATERTIGHT NEMA 12/4/4X SEAL. FAILURE TO FOLLOW THESE INSTRUCTIONS COULD VOID THE WARRANTY IF WATER DAMAGE OCCURS.

CP-BLNK series cover plates provide a pilot hole for easy integration of many different sizes and styles of conduit fittings. Ensure conduit and conduit fittings will provide a watertight NEMA 12/4/4X seal.

1. Drill Pilot Hole to recommended diameter provided by fitting manufacturer.

![Drill Pilot Hole](image)

2. Install fitting onto the cover plate per manufacturer's instructions. Insure a watertight NEMA 12/4/4X seal.

![Install Fitting](image)

3. Route all needed cables through fittings.

![Route Cables](image)

4. Connect all cables to the monitor. Secure cables by completely turning all strain relief screw locks. Use the USB strain relief clip (provided) to secure USB cables.
